**RIDER SGIS**  
**SMALL GENERATOR INTERCONNECTION STANDARDS**APPLICABILITY

This rider is applicable to Service Classifications R, GS-ND, GS-D, and LP Customers within SMECO's service territory seeking to interconnect energy generation resources to the electric distribution system.

In accordance with COMAR 20.50.09: Small Generator Interconnection Standards, the Company has established protocols for the communication, metering, and interconnection with Customers who are seeking to install a generation resource. This protocol will ensure the proper engineering and compliance with local, regional, and national codes.

COST

The Customer will be charged in accordance with interconnection levels as determined by COMAR 20.50.09. The following application fees apply:

- Level 1 – No charge: (10 kW and less, inverter based)
- Level 2 - \$50 plus \$1 per kW of rated generating facility output  $\leq 2$  MW;
- Level 3 - \$100 plus \$2 per kW of rated generating facility output  $\leq 10$  MW, no export; and
- Level 4 - \$100 plus \$2 per kW of rated generating facility output  $\leq 10$  MW, export.

APPROVAL

After receiving a standard small generator interconnection agreement from SMECO, the Customer will have the generation equipment installed and inspected by the local municipality. Upon receiving a certification of inspection from the municipality, the Customer will submit a certificate of completion to SMECO. The company will then install the necessary meter equipment on the premise.

The Company shall maintain a database to track the installation of new generation resources within the service territory and will submit reports to the Commission in accordance with COMAR 20.50.09.
